

Enterprise networking for space.

A next generation Ethernet switch designed for spaceflight. Deliberately crafted for modern spacecraft networks, it delivers enterprise grade performance, resilient system architecture, & the flexibility to support increasingly capable onboard computing systems.

+	8x 1000BASE-T Ethernet Ports	Power (Idle)	<3 W
+	Time Sensitive Networking	Power (Efficiency)	10 W
+	Virtual LAN Support	Power (Max)	15 W
+	2x RS-422/485	Input Voltage	12-36 VDC
+	2x CAN-FD	Mass	325 g
+	4x Buffered GPIOs	Size	118.2 x 100.0 x 20.0 mm
